

# 4ED1000

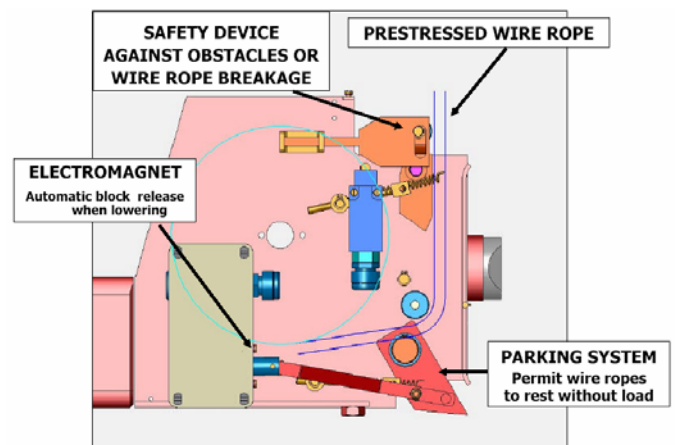

Hydraulic 4-post lifts 4.000 kg for passenger & commercial vehicles

## TECHNICAL SPECIFICATIONS:

Load capacity	4.000 Kg
Platform length	5.150 mm
Platform width	600 mm
Distance between posts	2.800 mm
Distance between platforms	Min/Max 800-1150 mm
Maximum lifting height	1.860 mm
Drive on height	190 mm
Lifting time	55 s
Motor	2.2 Kw – Three Phases 230/400V – 50/60 Hz
Overall length	6.101 mm
Overall width	3.164 mm

Single phase version: **4ED1051** (1.9Kw – 230V)

## GENERAL FEATURES

- Homologated and certified product according to the European Directive 2006/42/CE.
- Electro-hydraulic lifting system operating over a simple effect cylinder.
- Innovative design of columns without longitudinal welds.
- Parking system of platforms by automatic electromagnets.
- Automatic release of safety wedges by pushing "DOWN" pushbutton
- Movable piston or scissor jacking beam available on order
- Smooth and long platforms permit to service any type of commercial vehicle.

## SAFETY SYSTEMS:

- Safety system against obstacles on lowering.
- Height limit: mechanical stop limits the run of piston.
- Hydraulic cylinder with control valve of lowering speed.
- Safety device against cable breakage or looseness.
- Hydraulic safety valve against overpressure.
- Thermal detector on motor against overheating.
- Push buttons at 24 V, type "dead man" safety control, separated switches up/down.
