

Velyen, Automechanika Frankfurt 2016 news

1. Velyen rates Automechanika Frankfurt as the **biggest show for the European leading manufacturers** with an important export base.

2. Present our **new facilities in Spain** to manufacture only 2 post range. New **updated Notified Bodies SGS**:
 Engineering and manufacturing 100% in Spain & by Spanish:

3. Hottest news:
- i. **New hydraulic 4 Tns model 4EC16** 100% design and manufacturing in Spain, ready to meet new EN1493.2010 vs 2017.
 - o With this model Velyen is offering with the European design, materials and manufacturing, one of the fewest hydraulic models 100% European manufactured (ready to order in April 2017):

ii. Restyling model 4EB17 Electromechanical 2 columns: wider and with **heavy-duty one-piece base.**

- For decades, electromechanical lift was for those looking for reliable and durable equipment into workshops. 4EB17 is, undoubtedly, one of the most reliable ever made elevators, originally launched in 1964 as successor Istobal 42700.
- Compare the Velyen EB17:
 - This Velyen Lift incorporates an arm locking system that meets the very latest safety standards EN1493-2010 and HSE UK.
 - This Velyen Lift has a full 2650mm between the upright columns, wider than most on the market, giving easy access when opening car doors.
 - This Velyen Lift is supplied with a "one piece heavy duty" steel base.

- iii. **Restyling vullkollan pads** (manufactured in Spain with patented material), entirely designed by Velyen diam 120mm and 140 mm. with special reliable material.

- iv. Showed the **latest trends** of technical improvements that will be applied for the coming review **EN1493.2010 vs 2017** and plug & play devices.
- v. **New standardized arm locking systems**, more robust (complies with lateral force test by the Health & Safety test and the GEA-HSE UK; 1500N without permanent deformation and 2250N without breakage) with lower tooth pitch and axle locks diam. 22 mm.

- vi. **New wireless control torch** for the axle play detector (Standard factory-equipped), with autonomy of more than 2 hours with led light + 24 hours with control functionality

- vii. Improvement of scissors:

- Internal spring into cylinders to reduce noisy at lowering action by final stop
- 4EE13 with special **aluminum protection** on the top platforms

- Standard factory-equipped with power supply unit replacing power transformer, more stability on the electrical current and longer life of electronic components

- Direct lowering without going up first.
- Plug & Play oil hoses connections
 - **Design modifications:**
 - the lifting height from 1860 mm (+/- 30mm.) to 1950 mm. (+/- 30mm.),
 - Modification of the platform Width: From 635 mm to 650 mm.,
 - Supports and sliders from 2 to 4 giving stringer and more stability,
 - The lower scissors + 3mm of raw material,
 - double helping cam resting directly onto the scissor,
 - Cylinders slightly more inclined from the beginning improving efficiency (Picture 3), +50 mm. Between platforms (total of 2070 mm)

- 5 Tns Alignment scissor lifts: (will be showed our alignment partner)
 - Changes to Motor of 3 Kw
 - Adding a new auxiliary cylinder per platform, with less pressure more efficiency, loading more stable

History telling:

Velyen Manufacturer: Automotive Lifting Quality.

Velyen want to be your LIFT manufacturer helping you to increase business:

1. Made by Spain with a backbone of more than 6 decades (powered by Istobal).
2. We care after sales.
3. Spare parts guarantees.
4. Active member of European Association (EGEA).
5. Plug & Play assembling.
6. Family owned

Leader in vision and action: Velyen goes ahead with force to all countries like a specialized lifting manufacturer, since year 2001 powered by Istobal.

Main facilities are in Spain, manufacturing with a superb quality, supplied to more than 40 countries and meeting latest European Safety Standards.

WE JUST WANT TO SAY...
THANK YOU!
